Year 12 Geography Field Trip

Students of both Mr Miller’s and Ms Hunt’s Year 12 Geography classes undertook a day-long field trip to Port Noarlunga, Glenelg and Parkside on 17 March to investigate possible fieldwork topics and practise the skills required to complete their Individual Fieldwork Study, a major summative component of their Stage 2 studies.

Students looked into the possible impacts of tourism developments on the natural environment and on local residents.

The group also undertook a walking tour of Unley and Parkside to view possible urban-related fieldwork topics such as issues of heritage and development, use of recreational spaces, and urban consolidation and gentrification. Students studied such things as the Unley Council’s $5.44 million Glen Osmond creek redevelopment on Culvert Street in Parkside, and discussing the plethora of issues associated with this development.

Ms Hunt
Teacher

Bec, Georgina and Amelia (all Yr 12) practise their fieldwork sketching and observations at Glenelg foreshore
