**Gifted and Talented**

Pembroke School acknowledges the needs of gifted and talented students and endeavours to employ strategies and provide programmes which will challenge and extend all students.

These strategies and programmes may include individual support, enrichment activities, access to a differentiated curriculum, opportunities for acceleration within subject areas and participation in a range of problem solving and critical thinking experiences.

The aim of extension activities is to develop the intellectual, creative, social and emotional abilities of individual students. In addition to activities provided in regular classrooms, students may be withdrawn from class for small group or individual work.
